

QSX—II PORTABLE PLACER GOLD WASHING MACHINE

QSX—II portable placer gold washing machines is specially designed for the individual gold prospector and the geology exploration team to treat their bulk samples. Since it was put into commercial use in 1985, the equipment has been highly recommended by the users. This equipment is suitable for gold mining of the deposits of talweg and terrace types. It also can be used to recover gold from tailings of hard rock gold mining. The equipment has a fairly compact structure, all the screening, concentration and water supply being in one single body and driven by one single motor. It is easy to operate, easy to install and easy to move. The equipment is patented in China.

Technical specifications of washing machine

- | | |
|---|---------------------------|
| 1. Capacity: 1~2 m ³ /h | 2. Motor power: 2 X 3.5hp |
| 3. Water consumption: 10~12 m ³ /h | 4. Total weight: 400kg |
| 5. Outline size: 2.6m x 1.2m x 1.75m | |
